About ZY Assets

ZY Assets, a division of ZY Solutions, specializes in the design, implementation and ongoing support of best-in-class hardware, networking and infrastructure solutions for small and medium-size companies. We provide managed IT services that reduce and control operating costs and free internal resources to focus on company success.

Our Team

ZY Assets has been providing unparalleled support services to companies throughout the Midwest since 1997. With advanced degrees, industry certifications and years of practical experience, our skilled consultants listen and lead, providing the big-picture vision and tactical guidance that help companies achieve short-term goals and ongoing success. Leveraging long-term partnerships with Microsoft, Dell, McAfee, Cisco, HP and other select vendors, we develop, implement and maintain customized, cost-effective solutions that drive bottom-line results and maximize clients' technology investments.

Why ZY

While some technology support companies are ready to jump in with quick, off-the-shelf solutions that may or may not fit their clients' needs, we believe it's better for everyone to look before you leap.

Strategy First

At ZY Assets, our process begins with a detailed evaluation of your systems and network. We'll learn your technological needs, your business goals, your budget realities, and will identify the weaknesses and strengths of your current infrastructure design. With that perspective and background, we can recommend the right ways to meet the growing demands of your business and deliver efficiencies that increase your bottom line. It's a technology roadmap that protects your current and future investments, anticipates trends, and meets your evolving needs while positioning you for growth.

“Since 2005, ZY Assets has played a pivotal role in the success of our IT operations. We trust the ZY Assets team to provide a foundation for our growth by offering unparalleled technical support, innovative solutions, and guidance to address our immediate needs and strategic goals.”

Marc Lawrence, President
Lawrence Foods, Inc.

Outsourcing Your IT

As your business grows, you may find you need a more responsive technical team that understands how to use today's leading technology to overcome your unique challenges and achieve your business objectives. At ZY Assets, we'll assign your company a dedicated team of field-proven specialists who can work on- and off-site to provide the continuous collaboration that ensures your business goals and needs are met.

You'll enjoy streamlined and enhanced IT operations and budget-friendly support solutions that maximize results without the added burden of employee expenses.

Managed Services

Our team will proactively monitor your IT operations to maximize productivity, minimize outages, deliver ongoing support, make repairs and upgrades quickly and seamlessly, and secure data while ensuring compliance with industry regulations. Around-the-clock support will help ensure reliable operations anytime an unforeseen event occurs, day or night.

Proactive IT Solutions

Waiting for a problem to present itself can be costly. More than ever, downtime today can mean missed opportunities and lost business that may never be recovered. That's why we believe the best way to solve a technology problem is to keep it from ever occurring in the first place.

Remote Monitoring and Preventive Maintenance

At ZY Assets, we'll help eliminate technology-related downtime and maximize the performance of your systems and software through ongoing remote monitoring and regular maintenance that includes software updates, hardware upgrades and printer set-up and repair. In addition, you'll have access to our superior support whenever you need, allowing you to devote your company's time, money and human capital to other critical areas of your business.

We identify and eliminate issues before they escalate into problems, ensure systems are operating optimally, and reduce the risk of unforeseen outages, freeing you to run your business with the confidence that your technology systems will be there when you need them.

Security Evaluations and Policies

Protect your network and eliminate threats before they cause critical damage to your company. Our security-focused solutions are designed to provide the most effective and appropriate protection available for your systems, network, applications and information. We also can work with you to create effective and appropriate security policies to further protect your users from unforeseen risks.

“ZY Assets has provided me with peace of mind. The technologies they have implemented are reliable, secure, and will allow my company to grow. I can depend on their team to provide me with the best, most economical solutions. Whenever I need their help, I can be assured that they will respond quickly and effectively.”

Jay Simon, Vice President
One Plus Corporation

Backup and Disaster Recovery

We can minimize risks to your data – and thus your business itself – with technology that offers unsurpassed reliability and quick retrieval in case of an unexpected disaster. Our backup and recovery solutions can be designed specifically for your unique technological environment, helping ensure business continuity and providing the peace of mind that your critical data will remain safe, secure and accessible no matter the circumstances.

Project-Based Solutions

Our highly skilled professionals have expertise in a wide range of technologies, allowing you to augment or extend your staff to meet your strategic business goals. Following the completion of every project, we will provide the education and documentation that will allow your team to follow best practices moving forward.

Network and System Design

ZY Assets designs customized networks and systems for every specific environment, tailored to each client's unique business goals and challenges. Our seasoned team can work with your internal resources to develop efficient and scalable designs that ensure implementation success and guarantee maximum uptime. And if you are moving or establishing new offices, we can help set up equipment and networking at your new location, delivering a smooth and stress-free transition.

Virtualization Strategy and Implementation

ZY Assets can help improve your company's efficiency and profitability by implementing virtualization technology for servers, workstations and applications that directly translates to lower support and energy costs. And in the case of a technology disaster, virtualization files can be restored within hours, avoiding crippling losses and saving untold man-hours and dollars.

Mobile Strategy

Today's business world demands access to information 24/7. You need immediate information and the ability to react quickly in a fast-evolving business world where opportunity doesn't linger. That's why ZY Assets' consultants design, implement and support systems that enhance real-time communication, provide access to critical data anytime, anywhere and drive productivity and responsiveness.

“We are very pleased with the support ZY Assets has provided us over the last five years. Their flexibility to work during off-hours, both on-site and remotely has helped us maximize productivity and minimize downtime for our operations.”

Michelle Parker, Controller / HR Manager
Nitto Kohki USA

Primary Technology Partners

Through our long-term partnerships with companies offering best-in-class technologies, we have the solutions needed to safeguard your technology investment while delivering reliable, cost-effective solutions that enhance efficiency and drive growth.

Microsoft

As the worldwide leader in software for personal and business computing, Microsoft strives to produce innovative products and services that meet businesses' evolving needs. As a Microsoft Silver Partner and Small Business Specialist, we have been recognized by Microsoft as experts in providing a wide range of business solutions built upon Microsoft technologies.

McAfee

McAfee is an industry-leading provider of network security SaaS offerings, which include: email and web protection, email continuity and archiving services, endpoint protection, and vulnerability management. These solutions allow companies to lower overall IT costs, reduce risk and liability, and increase productivity.

DELL

For more than 26 years, Dell has been a trusted provider of leading-edge technologies to businesses and consumers worldwide. Backed by world-class customer support, Dell offers a wide range of scalable and advanced workstations and servers that can be customized to satisfy your long-term needs.

CISCO

For over 20 years, Cisco has been an industry leader in superior networking equipment. Cisco's broad range of networking products offer ease-of-use and value while offering the highest level of performance, security, and reliability.

About ZY Solutions

ZY Solutions is an information technology and multimedia consulting company that specializes in innovative solutions that allow businesses to quickly gain insight into operations, automate processes, build relationships, generate growth, and develop new capabilities. By offering professional interactive media services, paired with best-in-class technical expertise and support, we can deliver focused strategic solutions from design to execution.
